

# AUTO DARKENING SAFETY LENSES

## FRONT COVER LENS

The **Front Cover Lens** is designed to protect the auto-darkening lens from splatter, scratches, and other damage. It is much more cost effective to replace a safety lens than to replace the auto-darkening lens.

## INSIDE COVER LENS

The **Inside Cover Lens** is designed to protect your eyes in the case of an accident. Inside cover lenses are all **ANSI Z87.1 Certified**. Using an inside cover lens, in addition to safety glasses, is the safest way to weld.
